

ZOOM – 3 July 2024 – Discussion points

Trainers acquisitions:

1. Basic premise – acquire 4no Riots, plus control and support equipment for issue to Clubs who request use of them.
2. First principles: are there enough Instructors/Examiners to make best use of any purchases?
3. 'Apprentice' or Discovery@ as alternatives to 'Riot'
4. More Lipos instead of field charging; cheaper control gear
5. Policy doc to be drafted that user Clubs must sign on to
6. Clubs to be responsible for spares/repairs (will encourage proper use)
 - *or we hold spares acquired at 'trade' for issue to Clubs?
 - *centralise spares holding and/or extra airframe?
7. Do Clubs need to 'qualify'? – have instructors, candidates a training programme and track record. (see 2)
8. Clubs to indemnify via deposit for safe return.
9. Rolling programme of acquisition to supply all Clubs with equipt. of their choice
10. Arms length? Just give a one-off grant to Clubs who apply for it against some set criteria?

LOGO – design considerations:

1. How 'sacrosanct' is the BMFA logo?
2. Do we need to modify the current design?
3. Alternatives and how to go about designing and producing??
